ALPHABETICAL INDEX	93

How this guide is organized

This guide is categorized by departments. Under each department, the teaching staff are listed in scientific degree order (Prof. Emeritus, Prof. Dr., Ass. Prof., Lect., Ass. Lect., etc.), and then alphabetically, by first name, within each degree. Under each name comes the different ways (search terms or keywords) used to locate articles for that author. The alphabetical index at the end should help you to immediately locate an author.

The articles themselves are arranged in reverse chronological order, as far as possible. Where you find "No data available" this means the searched databases returned no data on the author. This is either because the author has not published any article, or he or she has published in periodicals that are not indexed by the used databases, or the author name utilized by the search process was incorrect. A " * " at the end of a citation indicates that the publication country is Egypt.

Databases used

We have used the following databases that cover all *Index Medicus* journals as well as important regional and national periodicals not listed in *Index Medicus*.

- **MedLine on CD-ROM (1966-present)**
- **MedLine Plus on DVD (1981-present, 1990-1992 missing)**
- **Pascal Biomed (1987 - Jun 2002)**
- **EMBASE (Jul 2000 - Jul 2002)**

Only articles found in these databases were added. No other sources were employed to qualify an article's entry into this guide. To maintain this guide's quality, unify sources, and avoid any bias, in next editions we will verify a request to add an entry against those databases. The request will be honored only if we found the requested article in one of them.

The full author names and scientific degrees were transliterated form the Arabic-language "Kasr El Aini Faculty Staff Member Guide" (MEDC and Community Services and Environmental Development Sector, 2001-2003)
